*Delta made landfall Friday evening in Louisiana as a Category 2 hurricane, hitting land just 12 miles from where Hurricane Laura slammed into the state in August. Louisiana has attributed 30 deaths to Laura, according to the governor.*

*Wind gusts climbed to 97 mph in Lake Charles, Louisiana, and 89 mph in Cameron, Louisiana.*

*Near Iowa, Louisiana, more than 17 inches of rain fell. In Lake Charles, more than 15 inches of rain was recorded. The highest storm surge recorded was just over 9 feet along parts of the south-central Louisiana coast.*

*In hard-hit Lake Charles, where there are still blue tarps on house roofs from Laura, mayor Nic Hunter said some houses did get flooding from Delta.*

*Electricity is out across the city and Hunter is urging residents to not come back to their homes if possible on Saturday.*

*Delta has since weakened to a tropical storm, but the threat is not over.*

© ABC News Delta may be weakening Saturday morning, but a tropical storm warning is still in place for parts of the South, including Louisiana, Texas, Mississippi and Arkansas.

*Delta is expected to bring torrential rain to parts of Texas, Louisiana, Arkansas, Mississippi and Tennessee through Saturday night.*

*A few brief spin-up tornadoes are possible on the eastern side of Delta's center through Saturday, which means there is a slight risk of severe weather for parts of Alabama and Georgia.*

*Delta will then move up to the Mid-Atlantic and Northeast by Monday morning. Delta broke a record when it became the first time a 10th-named storm made landfall in the continental U.S. within one Atlantic hurricane season.*

*The other nine named storms that made landfall this season were: Tropical Storm Bertha (South Carolina); Tropical Storm Cristobal (Louisiana); Tropical Storm Fay (New Jersey); Hurricane Hanna (Texas); Hurricane Isaias (North Carolina); Hurricane Laura (Louisiana); Tropical Storm Marco (Louisiana), Hurricane Sally (Alabama); and Tropical Storm Beta (Texas).*

© ABC News Delta is the 10th named storm to make landfall in the U.S. in the 2020 season, which breaks the previous record of nine storms in 1916.
